The Post Man

Does your mailbox have;

??? Four billion, two hundred ninety-four million, nine hundred sixty-seven thousand, two hundred and ninety-four messages in it?

??? Or even just ninety four?

Either way, *The Post Man* can help you manage your daily inbound emails and outbound bulk mail.

The Post Man

Chibi Ninja Mail

Creates a cross-platform encrypted multi-language email message, an inserted image, attached files and read receipt function. You can send and receive them using from your favorite mail software like Apple Mail on MacOSX or Outlook Express on Windows without complicated encryption mail setting. The recipient can decode using the same password you encrypted it with.

Direct Mail

Powerful mailing list management and mail delivery software with a user-friendly interface and powerful mail delivery engine that let you stay in touch with thousands of contacts quickly and easily — without worrying about the details of mail server configurations.

DockStar

Add new badges to the Mail dock icon and clickable indicators to the menu bar. Assign a badge to 5 different folders and mailboxes or assign badges to individual account inboxes.

Entourage Email Archive

Archive or export email, from within Microsoft Entourage, to many different formats and structures including Tab-Text format to import into Filemaker Pro Database.

E-List Distributor for Mac

Completely automate such tasks as notifying your existing customers and subscribers about new products and promotions, automatically mailing invoices and tracking numbers to online customers, or sending a daily or weekly newsletter to your subscribers. Automatically send larger mailings during the night or at other times on schedule to avoid over utilizing the networks during business hours.

E-Mail Commander

Send out uniquely customized e-mails to everyone in your database. by inserting variables in your contact database to further customize each message on the fly! Fully integrated with Address Book.

eMail Bounce Handler

A bounce email filtering and handling software that recognizes bounce email using a customizable set of rules and extracts recipient's addresses allowing you to use them again to try sending your message or to take them off your list.

Emailchemy

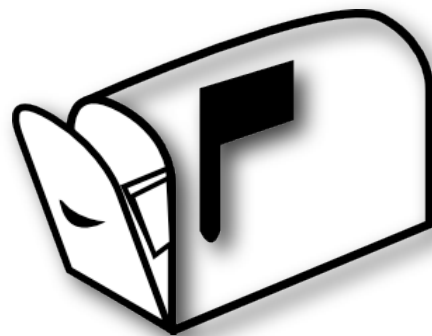

Convert: Emailchemy reads email from the closed, proprietary file formats of the most popular (and many of yesterday's forgotten) email applications and converts it to standard, portable formats that any application can use.

eMail extractor

Powerful and reliable tool to extract e-mail addresses from all kind of text sources like your local files, online web pages, plain text drops and the clipboard. It retrieves absolutely all valid e-mail addresses and generates an output file with only good and well formatted e-mail addresses without duplicates.

eMail Verifier

Works on the same algorithm as ISP mail systems do to determine if an email address, or batch of them, are actually valid.

Eudora

Long-standing leader in industrial strength email software.

Eudora Mailbox Cleaner

A simple drag'n'drop application which helps you migrating your mail and related data between different client programs. Contrary to most other solutions, it preserves message status flags (read, replied) and re-attaches attachments Eudora stripped from incoming messages. It supports migrating data from Eudora (both, Mac and Windows versions) and Thunderbird to Apple Mail or Thunderbird.

Export Address Book

Export all the data in your Address Book into a data file. It even recognizes fields with self-defined labels. You can choose between various export formats, like tab-separated text, CSV, HTML table and vCard (in Address Book, you cannot specify which fields to export when you create a vCard - in Export Address Book, you can).

FlagIt

Plug-in to Apple Mail that creates as many custom flags as you need - of any color and with any label.

The Post Man

Fun Card Maker

When Apple quietly discontinued their FREE iCard service, millions of people around the world were upset. Fun Card Maker allows you to create your own iCards with your own photos or images!

gMailContacts

Uploads your E-Mail addresses from Mac OS X Address Book to any gMail account.

JPEE Email Utility

A custom e-mail merge, email extractor, email verifier, data parser and all in one affordable email utility.

JunkMatcher

Filters spam by conducting a wealth of tests over emails. Integrates tightly with Mail.app - the filter will automatically spring into action via a rule within Mail.app!

Letter Opener

Process Microsoft Outlook winmail.dat files from within Apple Mail.

Letterbox

A plug-in for Apple's Mail.app that takes advantage of your widescreen monitor. It rearranges the interface into three vertical columns — so the message pane is to the right of the message list, rather than below.

MacFreePOPs

Access many web-mail only accounts with traditional email clients like Mail, Entourage, Eudora, or Thunderbird.

Mail Forward

Allows you to forward mail from AOL, Gmail, Hotmail, MSN, Netscape, and Yahoo web mail accounts to any e-mail address. Standard POP and IMAP e-mail accounts can also be forwarded.

Mail Unread Menu

A simple menu bar application which can provide you with a quick and easy way to see how many unread email messages are in Apple's Mail.

Mail Appetizer

A plug-in for Apple Mail that allows you to have a look at your incoming email without switching to Mail and the moment a new message is received, an onscreen notification window is displayed, giving you a brief summary of the message.

Mail Act-On

Create rules to perform actions on mail messages via simple keystrokes.

Mail Badger

Plug-in for Apple Mail that lets you create add multiple badges to Mail's dock icon, to indicate the number of messages in different mailboxes.

MailFX Pro

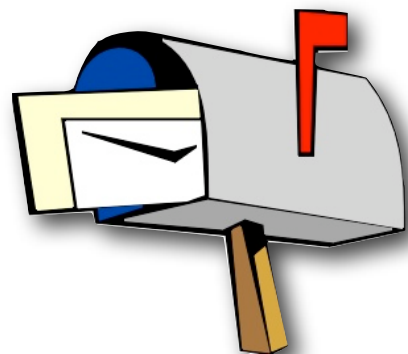

Replaces the sound warning of Mail, by an evolved notification system, customizable, offering many features.

Mailplane

Get Gmail out of the browser tab, but continue to use the Gmail web interface you know and love, but from Mailplane, a Mac OS X native application instead of your web browser.

Mail Scripts

A collection of AppleScript applications for Mail and Address Book offering additional features or simplified workflow.

Mailsmith

Makes sending, receiving, and managing email as intuitive and efficient as possible, whilst offering an unprecedented degree of flexibility, by been able to be customized to serve your needs through its powerful editing, filtering, and searching capabilities.

MailTags

Plug-in that transforms Apple's Mail into a powerful email organization system by using a convenient side panel to add tags keywords, project, priority, notes to your messages.

MaxBulk Mailer

Full-featured bulk emailer and mail-merge tool that allows you to send out customized press releases, prices lists etc and it handles plain text, HTML and styled text documents and gives full support for attachments.

MiniMail

Just like the mini-player in iTunes does for music, this plug-in for Apple Mail puts information about your inbox at your fingertips and you can easily see messages as they arrive, and quickly action them.

The Post Man

Personal Antispam

Analyzes your incoming e-mail, determining which messages are spam and which are valid messages, in many ways: by checking a whitelist of addresses, message content, message layout, URLs in messages, and much more.

PowerMail

Client for fetching, managing and searching e-mail.

Purify

Filter email, forward email, trace and report spam. Simple to set up yet with very powerful features.

Quaik

Lightweight mailer for single or bulk mailing. Includes a full featured integrated editor for creating plain text or HTML mailings and uses Address Book for simple recipient addressing. You can add any type of attachment and it supports secure connections, so you can use email accounts like Gmail.

RelatedMessages

Apple Mail plug-in that builds an index, similar to Spotlight, of all your mail files, and uses that index to find messages related to the currently viewed message.

SerialMailer

Automatically create personalized by using the integrated database editor. The group of recipients may then be individually filtered to only send the message to a limited group of recipients.

Signature Profiler

Plugin for Apple's Mail application that adds missing features from the way that signatures are handled and managed with your outgoing mail messages, especially if you have multiple mail accounts (and who doesn't these days).

SpamSieve

Gives you back your inbox by bringing powerful Bayesian spam filtering to Mac e-mail clients and it actually gets better over time as it adapts to your mail. By learning from the very messages that you receive, SpamSieve is able to block nearly all of your junk mail, without putting your good messages in the spam mailbox.

Thunderbird

Powerful email client from the same team that bought us FireFox. As you receive email, Thunderbird 2 will help you organize the most important messages to get you through your day through advanced tagging and search options.

TNEF's Enough

Allows Macs to read and extract files from Microsoft TNEF stream files usually received as an attachment named "winmail.dat" or a MIME attachment with the type "application/ms-tnef."

VacuumMail

An AppleScript application that performs the "vacuum" command on Apple Mail's underlying SQLite EnvelopeIndex database to compact this database and thus helps speed up Apple Mail. VacuumMail is designed to be incorporated into an automated maintenance routine and run at regular intervals.

WideMail

Customisable plugin for Apple Mail that provides wider columns in Mail's Windows.

BONUS: Mail Stationary

Dozens of stunning Mail Stationary Templates for use in business, special occasions, or just for fun are included on disc to enhance your outgoing Mail.
