

# Internet Alternatives

Long before the World Wide Web existed, the Internet had many uses and even today there are many services you can use without ever opening a web browser.

Here is a collection of sixty applications that allow you to download files, images and movies; chat instantly with people from around the globe; socialise with friends; purchase and sell goods and services online; play games; catch up on news and events; and even talk on the telephone!

# \$10

## Buy & Sell

### GarageBuy

Helps you find and purchase items on eBay. You can save your eBay searches, track your watched auctions and lets you bid on auctions without hassle.

### GarageSale

Create outstanding eBay auctions! GarageSale is a slick, full-featured client application for the eBay online auction system.

### GarageSale Basic

All the essential features for listing on eBay you dream about!

### iSale

eBay certified auctioning solution that offers a huge variety of integrated template layouts and the possibility to create and edit own templates with the Layout Editor. Established eBay features like item specifics, eBay-style preview, category listing, eBay store, auction status and after-sales management is included.

## Chat or Call

### Adium

Connects you to any number of messaging accounts on any combination of supported messaging services and then chat with other people using those services including AOL Instant Messenger, ICQ and DotMac, MobileMe; MSN Messenger; Jabber, including Google Talk and LiveJournal; Yahoo! Messenger, including Yahoo! Japan; Bonjour, compatible with iChat; MySpace IM; Facebook Chat; Lotus Sametime; Novell Groupwise; QQ and Gadu-Gadu.

### AIM

Instant Messaging client using AOL (compatible with iChat). Express yourself with your own icon and background -- even custom AIM sounds. Transfer files quickly and reliably so you can share your pictures and more.

### EventBox

All your Social Networking services in one place, integrated. Works with Twitter; Facebook; Goggle Reader; Flickr; Digg; Identi.ca; Reddit and RSS.

### iSoftPhone

Easy to use Internet phone using VoIP to provide crystal clear voice quality in an attractively sleek interface. The quick one-step configuration will allow you to get talking to other iSoftPhone users in seconds.

## Messenger

For Mac users who have a Windows Live account, communicate or collaborate on the fly with family, friends, or co-workers—down the hall or around the world.

## MySpace Chat for Mac

Powerful and convenient MySpace client that supports multiple chats in one window, smiles support, manage contacts, no annoying ads.

## Mumble

Low-latency, high quality voice chat software primarily intended for use while gaming.

## net4mac

Social Networking built exclusively for Mac users. It allows you to; Create your profile including the type of Macs that you own; Add friends to your profile and manage them; Contact members, send invitations to join the service; Create your own groups of interest and invite friends to join them; Browse and join groups you find interesting, share discussions; Search members matching your criteria; Discover people around you (other Mac users in your neighborhood).

## SightSpeed

Cross platform video, voice and text chat application.

Listing Continues...

## Skype

Make calls from your computer – free to other people on Skype, cheap to phones and mobiles across the world. And the sound quality is great, too – keep it running all day, and it's like you're in the same room as the person on the other end.

## SkypeCap

Captures and records audio calls made from Skype. Recorded calls are saved as MP4 files, to be replayed, shared, archived, or studied.

## Syrinx

Fully customizable twitter client designed for Leopard (OS X 10.5+).

## Twetie

Twitter client that keeps track of entire conversation threads.

## TwitterPod

A Twitter client with message store capability.

## X-Lite

If you are already a VoIP subscriber, X-Lite lets you make audio calls to any softphone, mobile or landline number, and make video calls and send IMs to any softphone which supports these functions.

## Yahoo! Messenger

Instant Messaging client for use with the Yahoo! and Windows Live Messenger services.

## Collect Images

### BeHolder

Easily navigate through hundreds of images, verifying whether they are still available on the web and downloading them for inspection or archival purposes.

## Newsgroup Image Collector

Perfect tool for collecting images from Usenet newsgroups as it can search one or more newsgroups for images by scanning each posted message. When a message contains image content, the image is downloaded to your computer.

## Web Image Collector

The perfect tool for collecting images from one or more web sites. It gives you the ability to download images from a single web page or from an entire web site. It can also search the web for images based on one or more keywords.

## Play Games

### Atlantis

Multi User Dungeons (MUDs) client specifically designed to aid in playing those type of games.

### GameRanger

The first and largest Internet multiplayer game matchmaking service for the Macintosh that lets you play over 500 classic, action, strategy, and simulation games and demos, online with friends and opponents worldwide. Offering features like profiles, friends lists, instant messaging, in-game voice communication, and competitive ladders, rankings and ratings.

### MudWalker

MUD client that features compact connection windows that use no unnecessary screen space; Supports Telnet, MCP, ANSI color, and TWin protocols; Full support for extended character sets, including Unicode and Windows encodings.

## Read News

### Cyndicate

Easy-to-use, next-generation, RSS/Atom syndication feed reader that gives you command over your news. Fetch, organize, and display news and articles from millions of websites and weblogs.

### Headline

Make catching up with the latest blog posts, articles and news feeds quick and more enjoyable. Easily share articles over iChat and Mail, with no need to manually send article links to friends.

### MaxNews

Very flexible and effective Usenet newsreader supporting reading and composing both news articles and e-mail messages. Provides the user with an efficient and extensible all-in-one interface towards dealing with large numbers of messages, no matter the form they may have or wherever they may come from.

### NewsLife

Simplest way to stay up-to-date with tons of websites without even having to touch your web browser until you see something you want to read. Just like your with your email client, NewsLife keeps track of which news stories you have read and which you haven't, lets you search and sort stories just the way you want.

### Nemo

Newsgroups/Usenet reader where you can follow your favourite discussion with an elegant and powerful user-interface that is designed to look and behave like an Apple Application.

Listing Continues...

exports to your workflow without  
ever leaving iPhoto. Packed with  
features like custom image sizing,  
on-the-fly file conversion, and a  
plethora of naming conventions,  
this is the easy way to get your  
photos where you need them,  
when you need them.

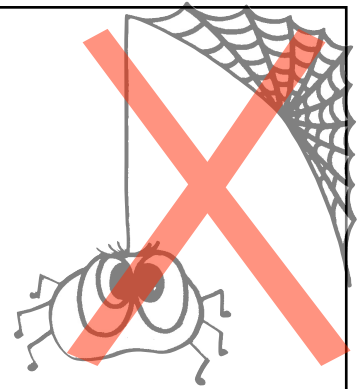

## Other

### Meerkat

An easy to use SSH tunnel manager  
providing a perfect marriage of  
UNIX power with Mac elegance!  
SSH tunnels (sometimes called  
port forwarding) are a way to use  
an SSH account on a server to  
forward other types of net traffic --  
for example, HTTP web traffic,  
iTunes music sharing traffic, or  
SMTP email sending traffic --  
through the SSH account. Then,  
this traffic appears to come from  
the SSH host instead of the original  
computer.

### SeaMonkey

All-in-One Internet Application  
Suite containing an Internet  
browser, email & newsgroup  
client, HTML editor, IRC chat and  
web development tools.

## ZOC Terminal

Telnet client, secure shell client  
and terminal emulator lets you to  
easily connect to hosts and  
mainframes via telnet, secure shell  
(SSH/SSH2) modem, serial cable or  
isdn.

PS: Be sure to check  
out 'The Post Man' and  
'MacServer' Discs for  
more applications that  
also use the Internet
