

Enhance My System!

Mac OS X is definitely the very best operating system out there!!!!

But there are always a few little tweaks that can help enhance it, just that little bit more!

Here is a collection of over 60 utilities that help you tweak and enhance your system, as well as monitoring your actual system performance.

- ❖ Application Launchers
- ❖ Backup Solutions
- ❖ Clipboard Boosters
- ❖ Finder Enhancers
- ❖ Hardware Monitoring
- ❖ Keystroke Automators
- ❖ Password Management
- ❖ Productivity Tools
- ❖ Standard Apps Replacers
- ❖ Screenshot Improvers
- ❖ System Tweakers

This disc was compiled by
 **AppleUsers**.ORG
and distributed by your local
 **Apple User Group**

The applications supplied on this CD are supplied as is and we make no representations regarding the applications nor any information related thereto. Any questions, complaints or claims regarding the applications must be directed to the appropriate software vendor. Various different license types apply. Some titles require further payment direct to the application publisher to enable the full feature sets and functions.

Application Launchers

Dock Spaces

Up to 10 Different docks;
Spaces integration; Setting Dock
names; Selecting Shortcuts

ExpressLauncher

A file launcher, allowing you to
have your favorite applications and
documents at your
fingertips. Store any kind of
Finder item: applications,
folders, documents, network
shortcuts. Different ways to pop
up the launcher window:
keyboard shortcut,
MightyMouse, icon in menubar
and icon in dock, screen edge.

HyperDock

Adds long awaited features to
your Dock: Select single
application windows just by
moving the mouse on a dock
item, use mouse clicks to
quickly open new windows and
many more. Window Previews –
Ever wondered how to bring a
single window to front instead
of a whole application? The
Window Preview bubble shows
you every single window of an
application just by holding the
mouse on a dock item!

Icon Pallet

The perfect complement to
your OS X Dock, Icon Pallet
keeps your icons in the same
location, and at the same size,
no matter how many you add
(up to 600).

LaunchBar

Provides instant access to
documents, applications,
contacts, bookmarks, music,
and much more — just by
entering short abbreviations of
the searched item's name. It
automatically learns from your
habits and gets better the more
you use it.

Switché

Used to replace the default
CMD+Tab application switcher.
It doesn't try to reinvent the
wheel and uses Exposé, with
which Mac users are already
familiar with. You can easily CMD
+Tab between applications, or
individual windows.

Backup Solutions

Carbon Copy Cloner

Clone, synchronize, backup.
Schedule and forget it.

Synchronize! Pro X

Makes bootable back ups of
your Mac OS X system disk and
synchronizes files between any
two folders.

Clipboard Boosters

Clipboard Evolved

Features a clipboard-like
window for managing clips, a
menu bar icon, and a cover-
flow interface for quickly
pasting clips.

ClipDoubler

Designed as an easy to use
application that gives you
unlimited clipboards. Double
click, and you can have all the
clipboards your heart desires.
Quit and you're back to one.
Simple as that. Supports text,
pictures, sounds, movies, and
many other resources. Open
and save clipping files, and it
can create internet shortcuts as
well. You can put the contents
of text and graphic files onto a
clipboard with a simple drag
and drop.

Clips

Your Mac OS X clipboard
reinvented: manage snippets,
expand text on-the-fly and
share clippings like never
before!

CopyPastePro

Time Machine for your
Clipboard! Easy to use, multiple
clipboard editing, archive and
display utility. See and edit any
clip in your history of copies or
in the more permanent clip
archives. Use the Clip Browser
(horizontal) or Clip Palette
(vertical) to see all clipboards in
an instant. Save all clipboards
through restarts. Tools to act on
clipboard data. Never lose a
clip again.

CuteClips

Integrates perfect with the look
of Mac OS X and completely
stays out of the user's way –
sitting in the background and
continuously records changes
to the clipboard in order to
provide access to them when
the user needs it.

myClippings

Store thousands of clippings
and you are free to archive
often needed clippings and also
grouping them is a no-brainer.

PTHPasteBoard

Watches you while you work
and keeps a copy of any items
that you have copied to your
pasteboard.

Quokka

Ten fully functional clipboards
(in addition to the standard
cmd+c clipboard) that you can
access through freely
customizable keyboard
shortcuts. Copy multiple images,
text or other data in parallel
and keep frequently used
expressions ready at hand.

Listing continues...

Savvy Clipboard

Remembers what you copied, and store those data items for you. It holds a list of items that you copied — text fragments, graphics, URLs, multimedia data, or links to files — and lets you access them using this list. You can label your items with brief notes, edit clipboard text items, send emails and store your passwords in a handy way.

Finder Enhancers

A Better Finder Attributes

Allows you to change file and photo dates and times, as well as other useful file attributes that the Finder won't let you touch.

A Better Finder Rename

Supports complex renaming tasks without sacrificing ease and speed of use. Simply drag the files you want to rename straight from the Finder into the large preview table or the application icon. Offers a complete set of renaming options that are organized into 7 categories covering all the text, character, position, conversion and truncation features that you would expect from a file renamer, but it does not stop there. Many more features.

QuickCopy

After choosing a destination in the panel, items can be copied there by selecting items in the Finder and then clicking a button. You can also perform several copies at once.

Default Folder X

Save your files effortlessly and open your folders instantly — makes Mac OS X's Open and Save dialogs work as quickly as you do. Custom keyboard shortcuts put your favorite and recent folders at your fingertips. Pop-up menus let you navigate your folders and open Finder windows. Support for QuickLook previews and Spotlight tags in your file dialogs mean that you Open, save, and get back to work

HyperSpaces

The ultimate way to customize your spaces. Customize each and every space the way you want using colors, desktop pictures, text labels and even the name of each space!

Orbiter

Powerful utility that enables you to access frequently used applications, documents and folders quickly and effortlessly. Built around a friendly interface, which can be fully customized to fit your individual needs. Although it aims to provide seamless system integration and exemplary ease of use, it does not take over your system, or change the way you currently use your Mac.

PowerRename

Rename any number of files in one step. Add text to the beginning, end, or middle of any filename, search-and-replace text, and change to upper, lower, or mixed case. Stamp filenames with EXIF data from digital photos, add or change numbering.

Renamerox

The simple way to rename, copy and move hundreds or thousands of files or folders with a single Drag-and-Drop using presets.

Secret Folder

An easy and fast way to hide personal documents and avoid them being seen, modified, or erased by other users. It allows users to hide multiple folders and their contents. Files and folders can be added by means of a single click on a choose dialog box or via drag and drop.

Tidy Up!

Search for duplicate files and packages; by the owner application, content, type, creator, extension, time modified, time created, name, label, visibility and date/age. You can also search by the tag, duration and bit installments of MP3 and AAC sound files and EXIF metadata, search the contents of the iPhoto, Aperture, iTunes, iPod databases and Mail mailboxes, and synchronize deletions with iPhoto, Mail and iTunes.

Hardware Monitoring

CheckUp

Designed to monitor the usage of CPU, Memory, Disk Drives and Network Adapters. Also able to detect the most common issues on a Mac and display details about how to fix them. Detect bad memory components or hard drive failures.

Drive Genius

Maintain, manage and optimize your hard drive with Directory Repair, Disk Defrag and Repartition-on-the-fly.

Listing continues...

Hardware Monitor

An application to read out all accessible hardware sensors in Macintosh computers. Currently more than 100 different Macintosh hardware sensors and more than 200 hard drive temperature sensors are supported.

MainMenu

A powerful maintenance tool to keep your Mac running like new. With MainMenu you can free up disk space, fix common problems, including reduced performance, application crashes, Finder showing the wrong file icons, and Spotlight not showing files you know exist.

SMARTReporter

Be warned of some hard disk drive failures before they actually happen! It does so by periodically polling the S.M.A.R.T. status of your hard disk drive. Self-Monitoring Analysis and Reporting Technology is built into most modern hard disk drives that acts as an "early warning system" for pending hard disk drive problems. It can notify you of impending hard disk drive failures by sending e-mails, displaying a warning dialog or executing an application.

Keystroke Automators

Keyboard Maestro

Create macros to launch documents or applications, resize windows, type commonly used text, or control and enhance just about any application. Things like typing in your name or email address, opening specific documents, resizing windows to particular locations, can all be done at the press of a key.

KeyCue

Helps you to use your Mac OS X applications more effectively. Just hold down the Command key for a while and it comes to help by showing a table of all currently available keyboard shortcuts. You no longer need to memorize key combinations. Over time, you will automatically remember frequently used shortcuts and become a power user of your favorite applications, working much more efficiently.

PopChar X

A utility application that lets you insert special characters, accented letters, umlauts, etc. from all installed fonts into your documents. You never need to search for and remember keystrokes any longer. Just pop up the window, click the desired character, and the character appears in your current document. If a font contains Unicode characters, you can see all of them, neatly arranged in the standard Unicode categories.

TextExpander

A utility that helps you type more efficiently and accurately by watching what you type and inserts predefined snippets on the fly whenever you enter their corresponding abbreviations.

Typinator

Boosts your productivity and eliminates errors by automating the process of inserting frequently used text and graphics and auto-correcting typos and misspelled words.

Password Management

1Password

Password manager and form filler that keeps track of all your confidential information in a highly encrypted format. You are able to store all your confidential information like passwords, credit card numbers and other sensitive data in one secure place.

8Passwords

For all those web passwords that seem to multiply, you can now easily find the one you are looking for. All passwords are always available from the menu bar. Passwords, login ID's and any notes are one click away. Of course you can store more than 8 passwords. You can store as many as you like.

Pastor

A tool to store all your passwords, website logins, serial numbers, etc. encrypted and password-protected. With built-in password generator.

Productivity Tools

AlienConverter

Makes file format conversions easy and simple. You can convert single or multiple files at once into the following formats: Microsoft Word (.doc), Rich Text Format (RTF/RTFD), Simple Text (.TXT), HTML Documents, (HTML Web Archives), and (XML) Documents. XHTML is supported through convenient conversions from HTML and to HTML. You can also instantly convert multiple formats into single file format.

Listing continues...

DropBox

Allows you to sync your files online and across your computers automatically.

iMedia Browser

Built to resemble the media browser found in several Apple applications, but is a stand-alone utility that can be used to quickly access a user's library of photos, sounds, movies, or bookmarks.

MacKeeper

All-in-one solution for your Mac that combines a set of drive clean-up utilities, standalone tools, and online services. Simple and powerful, this app will make work easier for beginners and give more flexibility to experts.

NTFS-3G

Provides safe and fast handling of the Windows XP, Windows Server 2003, Windows 2000, Windows Vista, Windows Server 2008 and Windows 7 file systems.

NuKit

Productivity and timesaving toolkit: launcher, shortcuts, advanced calculator, tweaker, window mover, real zoom and real close.

OptimUSB

Run before ejecting your USB drive. Mac OS X and Windows temporary files get deleted (.DS_Store, .Trashes, .Spotlight-V100, Thumbs.db). OptimUSB eject automatically your drive. Now, your USB is clean, optimized and ready to be removed safely.

Standard App Replacers

atMonitor

Better alternative to Apple's own "Activity Monitor" that displays system activity in real-time.

Burn

Keep your files safe and share them. Burn your files to a disc so you can access them later on. Choose different filesystems so you can share your files with people with different operating systems. Change advanced settings like, file permissions, the disc icon, file dates and more on the fly in Burns inspector. Let the music be with you. Create standard Audio-CD discs with ease.

Fontcase

A font management application that provides an elegant and powerful workflow to help you organise the fonts you have installed on your system. Designed to be an iPhoto for your fonts, it has a powerful tagging system, which is designed to let you control your fonts like you control your music.

SimplyBurns

Comes with audio and data project, duplication mode, burn image mode, and disc ripping mode.

The Unarchiver

A much more capable replacement for "BOMArchiveHelper.app", the built-in archive unpacker program in Mac OS X. The Unarchiver is designed to handle many more formats than BOMArchiveHelper, and to better fit in with the design of the Finder. It can also handle filenames in foreign character

sets, created with non-English versions of other operating systems. Supported file formats include Zip, Tar-GZip, Tar-BZip2, Rar, 7-zip, LhA, StuffIt and many other more or less obscure formats. Support for so many formats is achieved by using the libxad unarchiving library.

Screenshot Improvers

ScreenRecord Studio

All-in-one screen capture production suite. Easily capture on-screen action to a movie from start to finish. It's the best of both worlds: the power of MediaEdit and ScreenRecord. It includes everything you need to create your presentation. Import video clips, images & audio to create clear and powerful presentations. Engage viewers with text & video transitions, and easily add voiceovers to personalize your results as you maintain total control over all audio mixing and editing steps. Picture-in-picture narration is a breeze! It integrates seamlessly with QuickTime and iMovie.

ScreenSteps

Helps you answer questions by automatically creating image-based documents as you capture screenshots. Using the integrated authoring tools you can quickly annotate images and add text. When you are finished you can export to HTML, PDF, Word (DOCX), WordPress, TypePad, Blogger, Movable Type, MindTouch, Confluence, Google Sites, Joomla or ScreenSteps Live.

Listing continues...

Sequence

Capture the content of your screen. It can handle capturing DVD, audio, or any other multimedia application and is powerful enough to simultaneously record from your webcam and your screen. With the voice recording function, you can easily describe what you are doing on your screen. Simply use your Mac's built-in microphone. It's easy to make training videos, product demos, create tutorials, or archive streaming video.

Snapz Pro X

A quantum leap in video capture technology, adroitly capturing full motion video of anything on your screen at a blistering pace, complete with digital audio, and an optional microphone voiceover.

System Tweakers

Arrange

Control position and size of applications' windows. With two mouse click or one keyboard shortcut, selected window can be repositioned and resized.

CleanMyMac

Sophisticated all-in-one-suite utility that helps keep your Mac clean and healthy, enjoying smooth system performance combining such vital features as Slim Universal Binaries, Clean Unneeded Languages, Logs Rotation, Clean Caches, Quick and Secure Erase, Application Uninstallation, and Killing Trash Left From Buried Applications.

Cocktail

Serves up a scrumptious mix of maintenance tools and interface tweaks, all accessible via a comprehensive graphical

interface. Most of Cocktail's major features are arranged in five basic categories. In addition, a Pilot lets you clean, repair and optimize your system with one click of the button.

Cronette

Specify tasks to be launched automatically.

Deeper

A personalization utility for Mac OS X which allows you to enable and disable the hidden functions of Finder, Dock, QuickTime, Safari, iTunes, Login window, Spotlight and many Apple's applications.

Display Maestro

Gives you full control over attached displays, allowing the usage of all available resolutions and bit depths. Ideal for running legacy games which require 256-color mode and do not automatically switch the screen depth for you. Mac OS X 10.5 Leopard removed the ability to set 256 color mode manually using the built-in preferences pane, but the feature is now available again.

MacPilot

Scared of the terminal or can't be bothered to remember those commands to customize your system the way you want? Easily enable and disable hidden features in Mac OS X, optimize and repair your system, and perform numerous routine maintenance operations with the click of a button!

Mouseposé

Helps you quickly locate the mouse pointer when you return to your work after an interruption. Visually impaired people say that it helps them as well.

OnyX

A multifunction utility that allows you to verify the Startup Disk and the structure of its System files, to run misc tasks of system maintenance, to configure some hidden parameters of the Finder, Dock, QuickTime, Safari, iTunes, Login window, Spotlight and many Apple's applications, to delete caches, to remove a certain number of files and folders that may become cumbersome and more.

SysSounds Xtra

Provides dozens of system sound files to expand on the 14 files available in the OS X System. The sounds, alongside Apple system sounds, will be available in the menus of all the applications on your computer which can use system sounds, including System Preferences.

TinkerToolSystem

Collection of system utility features assisting you in performing advanced administration tasks. Uses a self-adapting user interface which automatically adjusts to the computer model and to the version of Mac OS X you are running. All options available in the current situation are accessible via "panes", very similar to the techniques you already know from the System Preferences application.

Xupport

Provides many features to configure hidden Mac OS X and Unix options, to increase system security and performance, to maintain and backup Mac OS X, and to dig deeper into the world of Unix.
